

Telemetry Sensor Specs & Calibration

Documentation for the IoT sensors streaming via EMQX Cloud to the Predictive Maintenance database.

Sensor Type: Triaxial Accelerometer (Vibration)

Range: +/- 50g

Sensitivity: 100 mV/g

Calibration Protocol: Verify 1g response at 159.2 Hz annually using a portable shaker table.

Sensor Type: RTD PT100 (Temperature)

Range: -40°C to +200°C

Accuracy: Class A (+/- 0.15°C at 0°C)

Mounting: Must be flush against bearing housing with thermal paste.
